GAPPD Scores

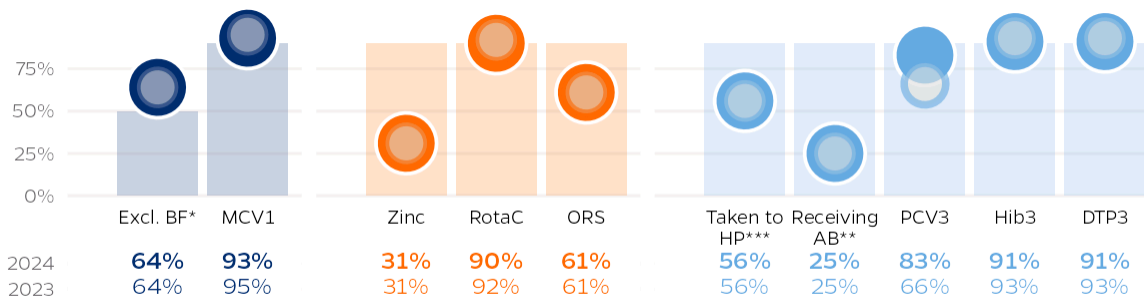

India had the highest Overall GAPPD score, due in part to the successful National PCV roll-out which showed an increase of 17% this year.

Breakdown by Indicator

Here we show the country's performance on each indicator against the targets (the vertical lines). The other 14 countries in this year's global report are shown as smaller faded dots. The columns on the right provide the score for this country and the median score across all 15 countries.

Below, the GAPPD targets are represented by the height of the faded bars. The solid dots indicate the percentage of coverage achieved by the country this year; the faded dots are last year's measurements.

* Exclusively Breastfed; ** Receiving Antibiotics; *** Taken to Health Provider
